

CES: FLIR Systems Announce Night Vision System

Date: 01-10-2008

FLIR Systems announced and showed an aftermarket night vision camera at CES. The product is called PathFindIR and has 320x240 pixel resolution. The night vision camera is similar to the night vision camera used in the BMW 5-, 6- and 7-Series. FLIR System is the supplier of BMW's night vision cameras via Autoliv, which is BMW's supplier. FLIR Systems uses Autoliv as the exclusive supplier for the automotive market for the next two years. FLIR will also supply night vision systems to an unannounced OEM in the future. Forward Looking InfraRed (FLIR) technology is also used in commercial, maritime, security and aviation applications.
