US Gov. Jurisdiction: US Department of Commerce

Regulatory Website: www.bis.doc.gov

ECCN: 6A993 (See products excepted from 6A003—9hz products are excluded)

USML Category: N/A

Harmonized Tariff Number: 9027504020

Classification Information:

Because these products operate at 9hz, they are controlled for export under US Department of Commerce, Export Administration Regulations (EAR), Export Control Classification Number (ECCN) 6A993. They may be exported under ECCN 6A993, NLR (No License Required) to all countries except embargoed (Country Group E:1) and terrorist supporting countries, unless otherwise prohibited.*

Permanent / Temporary Exports:

These cameras may be shipped NLR to all countries except embargoed (Country Group E:1) and terrorist supporting countries, unless otherwise prohibited.* Additionally, they may not be used in the design, development, production, or use of nuclear, chemical or biological weapons or missiles.

Process/Export Documentation Required:

The following steps should be taken when exporting this system(s):

- Restricted Party Screening
- Create a Commercial Invoice: must include product description, quantity, value, destination control statements and proof of AES transaction (if applicable)
- Generate an AWB (unless hand-carried)
- File an AES (Automated Export System) record (unless exempt) – Additional information regarding AES filing requirements and exemptions to filing can be found on the US Customs website: <http://www.aesdirect.gov/> and the Census regulations website: <http://www.census.gov/foreign-trade/regulations/regs/flipper/index.html#toolsoftrade>
- Consider obtaining a carnet to ease the clearance process in and out of eligible countries. Consult <http://www.atacarnet.com/> for additional information. The carnet must be presented to Customs at port of export and import from/into the United States.

Assistance:

For additional information regarding how to export a system, please contact Export Counseling:

- Northern Calif. 408-998-8806
