

United VMS Version 7.0 Begins Expansion-Only Period

January 4th, 2019

United VMS (UVMS) 7.0 platforms; Latitude, Horizon and Meridian, were first released in Q4 2015 and have been upgraded with Software Updates. The 7.0 versions were followed by releases of UVMS 8.0 and Latitude 8.1, which introduced many exciting features, improved performance, and enhanced integration with other platforms and edge devices.

Our standard policy of 3 years support after GA, has now come to an end and FLIR now announces End of Support and the beginning of the Expansion-Only period for all United VMS systems version 7.0.x.x.

During the Expansion-Only period:

1. Technical support and new bug fixes for United VMS V7.0.x are no longer available. We encourage these customers to upgrade to a newer software version.
2. Customers with valid SSA may request license updates to existing United VMS V7.0.x systems.
3. Customers may request and will be directed to download relevant United VMS 7.0.x.x documentation and software.

Customers are advised to upgrade to a newer version of United VMS prior to any troubleshooting. Upgrades are available for free to customers with valid SSA. Customers are encouraged to purchase SSA that will include both the upgrade as well as on-going technical support for a newer version. For details on SSA program please contact VMSServices@flir.com.

From this announcement onwards, FLIR will offer and sell new base licenses exclusively for United VMS versions 8.0, 8.1, or later.

FLIR will be releasing new fixes and other software modifications exclusively for United VMS versions 8.0, 8.1, or later.
